

Students will experience the welcoming atmosphere of Gallery Stratford as they enter a hands-on workshop led by an Art Educator. The creative process will drive students as they delve into professional art materials to create their own masterpieces based on the Ontario Arts (A), Mathematics (M), Science & Technology (ST), and Social Studies (SS) Curriculum.

ecoscape

The art of printmaking is the focus of this workshop as students explore microorganisms of an ecosystem and carve them into softoleum to create prints on different personalized backgrounds. *(A, ST)*

satellite
view

Students will look at satellite imagery to explore abstraction as this sparks creativity; students will work with large watercolour paper, paint and white oil pastels to make a vibrant 'map' of their favourite or creative location. *(A, SS)*

exhibit
based

As students explore the Gallery they will be challenged to use the critical analysis process to create their point of view on the exhibitions and be inspired to create their own, grade based, masterpiece as it reflects the works of local artists. *(A, M, ST, SS)*

Custom workshops can be arranged to suit classroom topics and needs, call today to arrange!

pricing &
contact
